

It is well known that the spiritual, cultural and emotional aspects of care are best served in a peaceful and home like place that has access to nature.

Valley Hospice Foundation raises funds to support non-medical services including professional development for the care team, volunteer services, complementary therapies, bereavement support, and special enhancements to the Hospice residence.

This year our fundraising is focused on finishing the hospice grounds with gardens, a small walking trail, a children's play area, patio furniture and planters.
